The South East Metro Amateur Radio Club is a group of folks from this region interested in the growth and development of amateur radio.

We have meetings with programs and projects for education, public service and personal development. You are invited to join us and do the same.

Please come and visit us and let us tell you about the club.

Regular monthly meetings and VE testing sessions are held in Cottage Fire Station Number Two.

Monthly Meetings are the last Tuesday of each month except December and January. Meetings start at 7:00 pm. Refreshments are served.

VE testing Sessions are held on the third Saturday of each month except December. Testing sessions start at 9:00 am. It is a good idea to call ahead to verify the date and seat availability.

Cottage Grove Fire Station Number Two is located at 8641 - 80th Street South. See map below.

From the intersection of I-494 and US Highway 61, proceed south to 80th Street and thence east about one and one-half miles to the fire station. Park in the West parking lot and go in that door.

You may go to the club web site and check things out there. Any questions, call the club answer line at 651-769-0358. Someone will call you back.

To All Local Amateur Radio Operators,

As an Amateur Radio Operator and President of a local Ham Radio Club, I would like to congratulate you on your new Amateur Radio Operating License. If you are new to Amateur Radio, let me welcome you to a fantastic hobby.

I have enclosed a couple of brochures that you might find of interest. The members of the SEMARC, (South East Metro Amateur Radio Club) are active in many areas of Ham Radio and are eager to help you learn and participate in these areas. You are welcome to stop in and check out us out at one of our meetings. We meet in Cottage Grove on the last Tuesday of most months. Directions and a brochure are enclosed.

Sometimes, the new amateur radio operator finds it difficult to get on the air without the help of a mentor. The club is willing to help out and you can come and visit us to get more information. In addition, the club has a well equipped station that you can use for learning and operating.

If you are interested in Public Service, Washington County ARES is always looking for members to train and assist in Emergency Communications during times of civil crisis.

Take a look at these brochures and please call the phone numbers listed on the brochures if you have any questions.

Have fun in your new hobby.
